

A Career with COPA-DATA

COPA-DATA is an innovation leader in the industrial automation sector. Forward thinking in our solutions, open-minded, active worldwide. As a dynamic, successful corporation, we are continually growing and expanding our team. We're looking to fill the position of:

Software Security Specialist (m/w/d)

COPA-DATA Headquarters Salzburg

Key responsibilities:

- Design and implementation of a Secure Development Lifecycle including security testing (Windows patch tests, vulnerability assessment, penetration testing, fuzzing etc.)
- Content-related implementation of IEC62443-4-1 certification and, if necessary, further security-relevant product-side certifications
- Support of security-relevant internal and external audits
- Cooperation with security-relevant company partners
- Support of external security-relevant communication (e.g. security newsletter)
- Collaboration on the resolution of security-relevant tickets
- Security assessment of external components (Mend Scanner)

Requirements:

- Security testing knowledge
- Security in software development and automation environment
- Basic programming skills
- Good project management and communication skills
- Talent to communicate complex technical content
- Fluent English language skills

What you can expect:

- Come as you are - no dress code
- Early riser or morning grouch/night owl? It doesn't matter! Thanks to our flexible working hours, you can optimally combine work and leisure time.
- We rock together! Teamwork makes the dream work
- Learning and growing never stops with us. Be a co-creator of your tasks and set priorities according to your interests and strengths.

A creative and precise way of working, embedded in a constantly growing international team, is your way of making the best industrial software even better known worldwide? Then write now to Martin Binder at jobs@copadata.com. The minimum classification for this position is ST1/entry or regular level according to the IT collective agreement. The final gross salary is in line with the market and is based on your education, qualifications and experience.
