COPA-DATA

Your Path to the Future of Industrial Automation

Experienced Project Engineer (m/f/d)

Are you an experienced Project Engineer looking for a new challenge away from constant commissioning and project stress? Do you want to utilize your expertise and shape the future of industrial automation together with a successful, globally operating software manufacturer? Have you already worked with tools such as zenon, Aveva, WinCC, B&R, or Simatic STEP7? Then read on!

Here's What to Expect with Us:

- ▶ **Genuine Work-Life Balance:** No all-in contract, but the opportunity to optimally balance your professional and personal life thanks to our flexible working hours.
- ▶ **Lived Team Culture:** We believe in the power of collective success. Therefore, we promote a respectful, solution-oriented, and collegial working atmosphere. Numerous employee events attest to this.
- ▶ **Peer-to-peer Learning:** With us, you benefit from the know-how of the developers of one of the best software platforms for automation. We share our knowledge and continually learn from each other's experience. Together, we grow through new challenges.
- ▶ **Fair Compensation:** Attractive remuneration that corresponds to your experience and qualifications, along with the opportunity to work in a valued environment.
- ▶ **Come as you are** – no dress code required.

Key responsibilities:

- ▶ **Technical Expertise:** Utilize your experience in automation, PLC (Programmable Logic Controller), and the industrial environment to develop and implement individual solutions.
- ▶ **Mentoring and Consulting:** As a technical mentor, you enrich our team, share your knowledge, and develop prototype projects together with our customers.
- ▶ **Project Manager:** From the initial effort estimation to successful project completion, you are the pivotal point for Agile implementation. You understand the needs of our customer's, their system requirements, and are able to translate them into project tasks.
- ▶ **Customer Interaction**: Your mediating role enables successful projects through close communication and coordination with our international customers and internal teams.
